

Electron Reconstruction Study

Wenting Tan

Hampton University

30Aug 2012

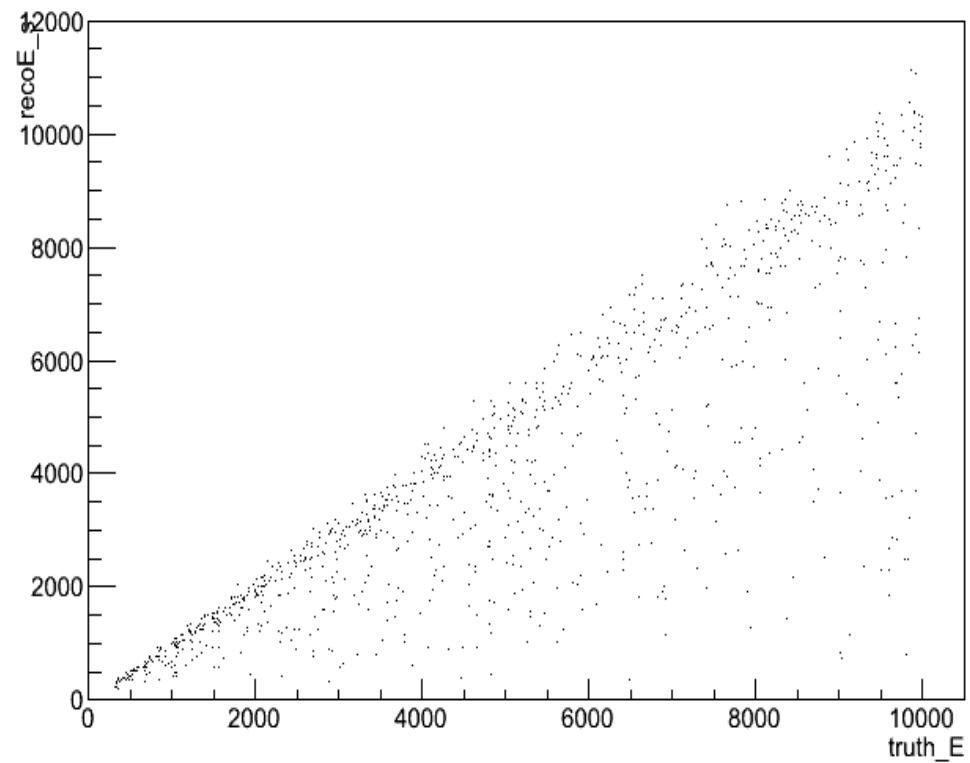

Electron Particle Gun Sample

Following Plots are from sample:

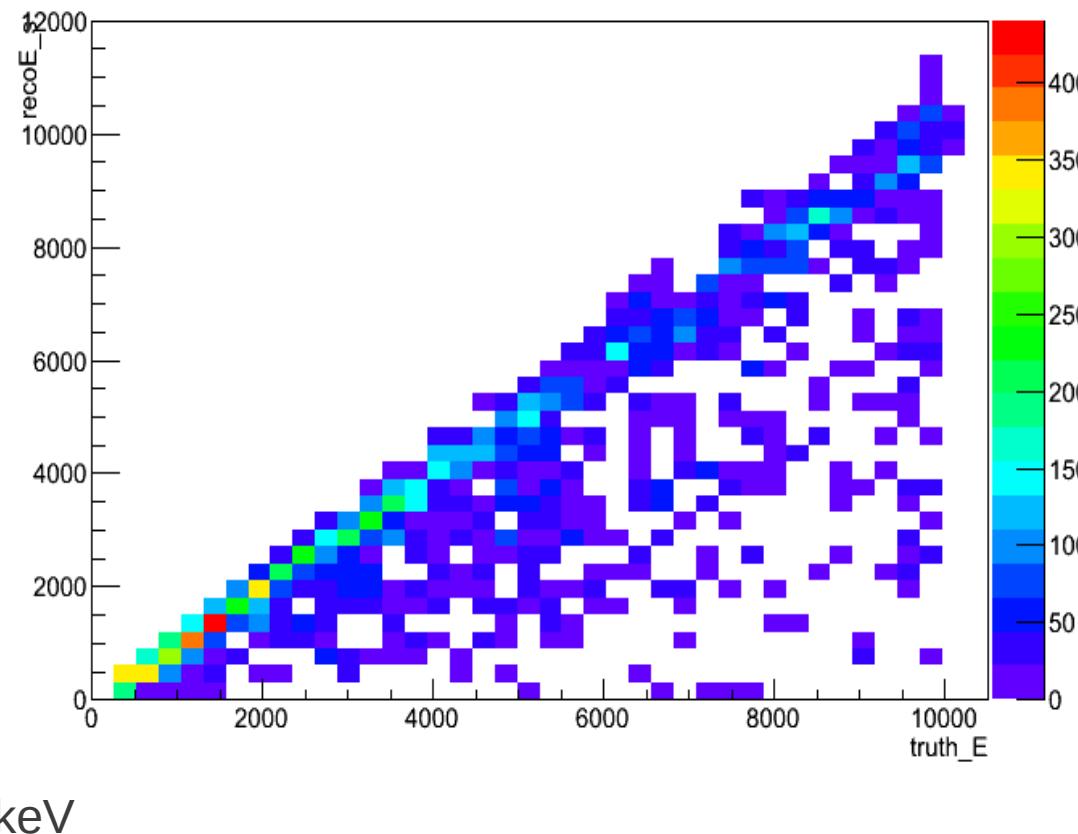

```
/minerva/data/users/jwpark/mc_production_v10r2p3/grid/central_val  
ue/minerva/ana/v10r2p3/00/00/01/00/SIM_minerva_00000100_*_An  
a_Tuple_v3_v10r2p3_ConeDelta50_v14.root
```

recoE vs truth_E

recoE_s:truth_E

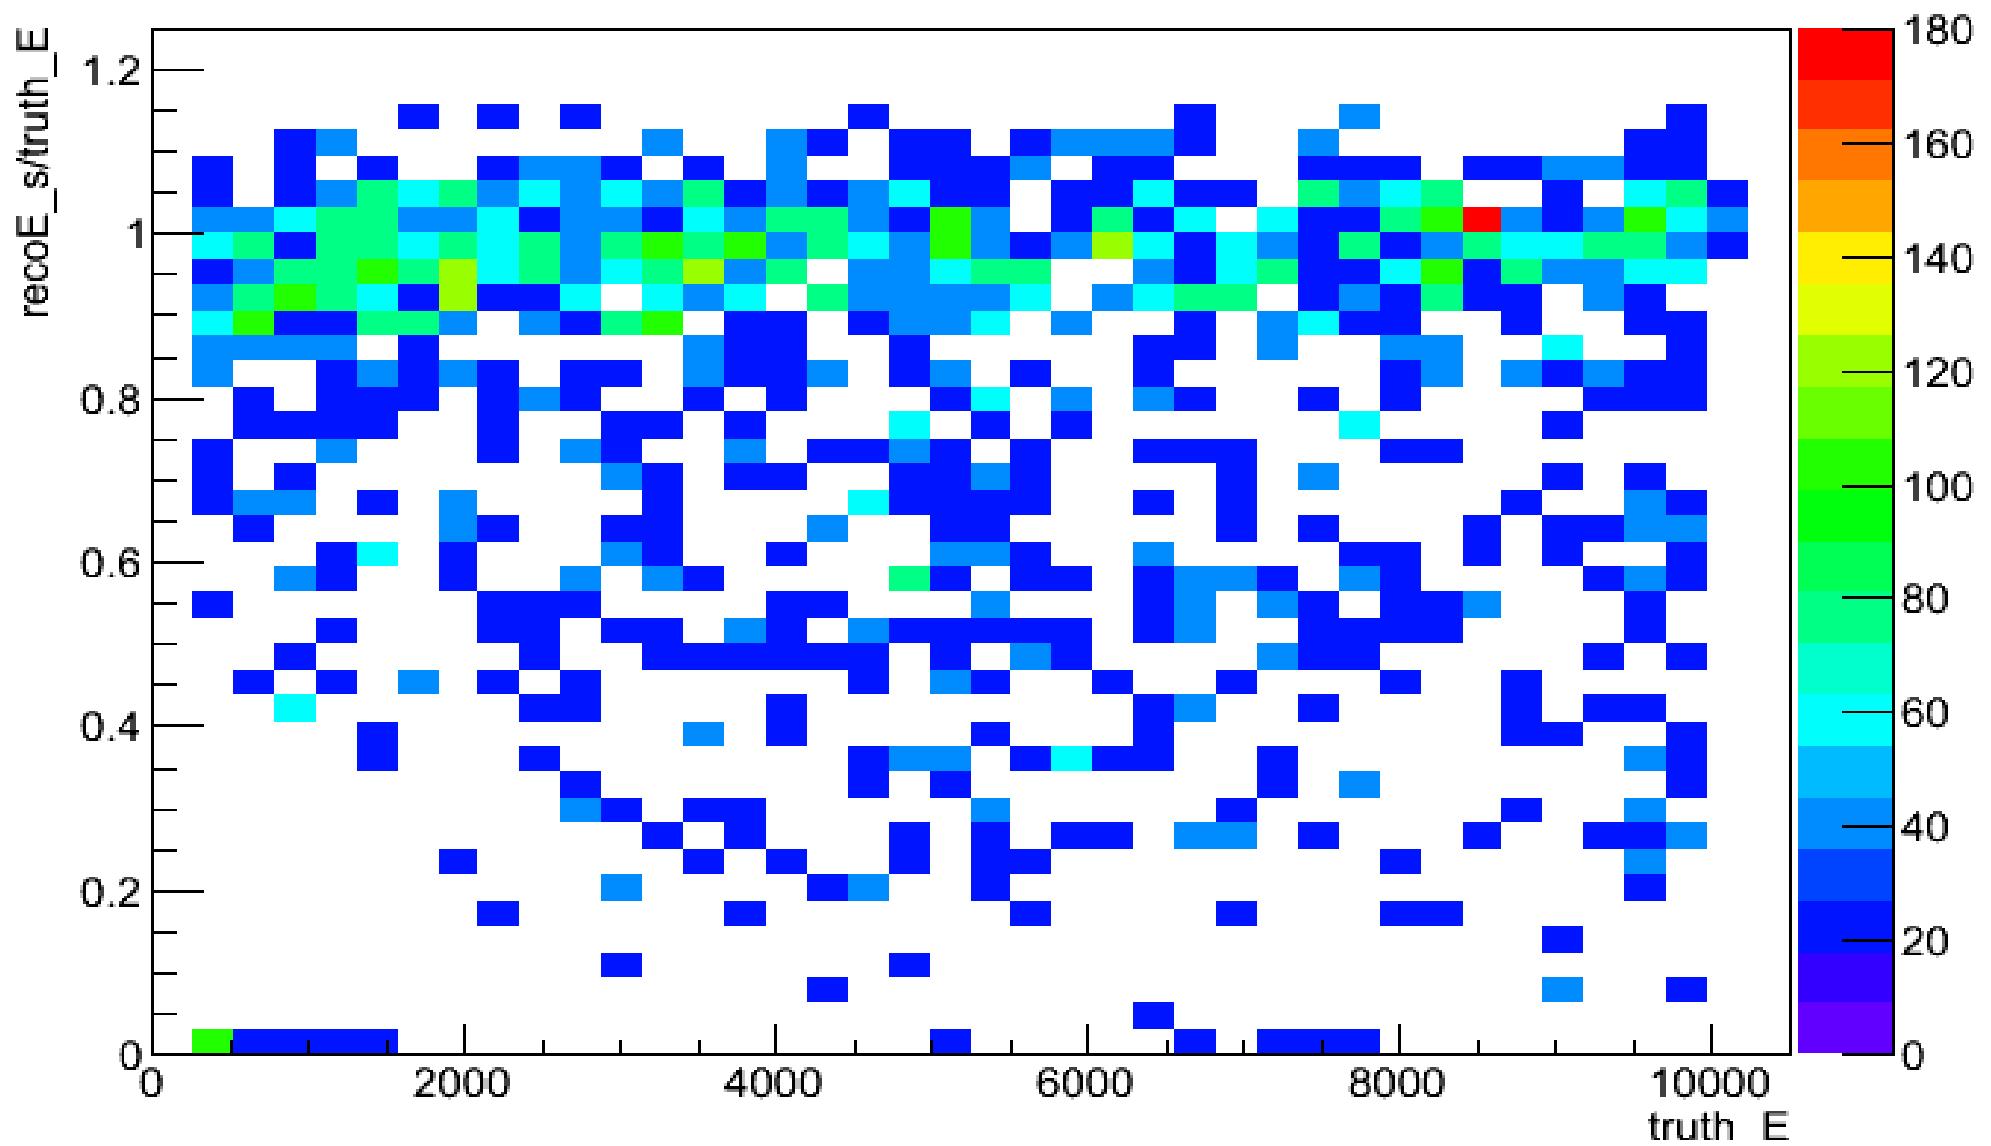

recoE_s:truth_E

recoE/truth_E vs truth_E

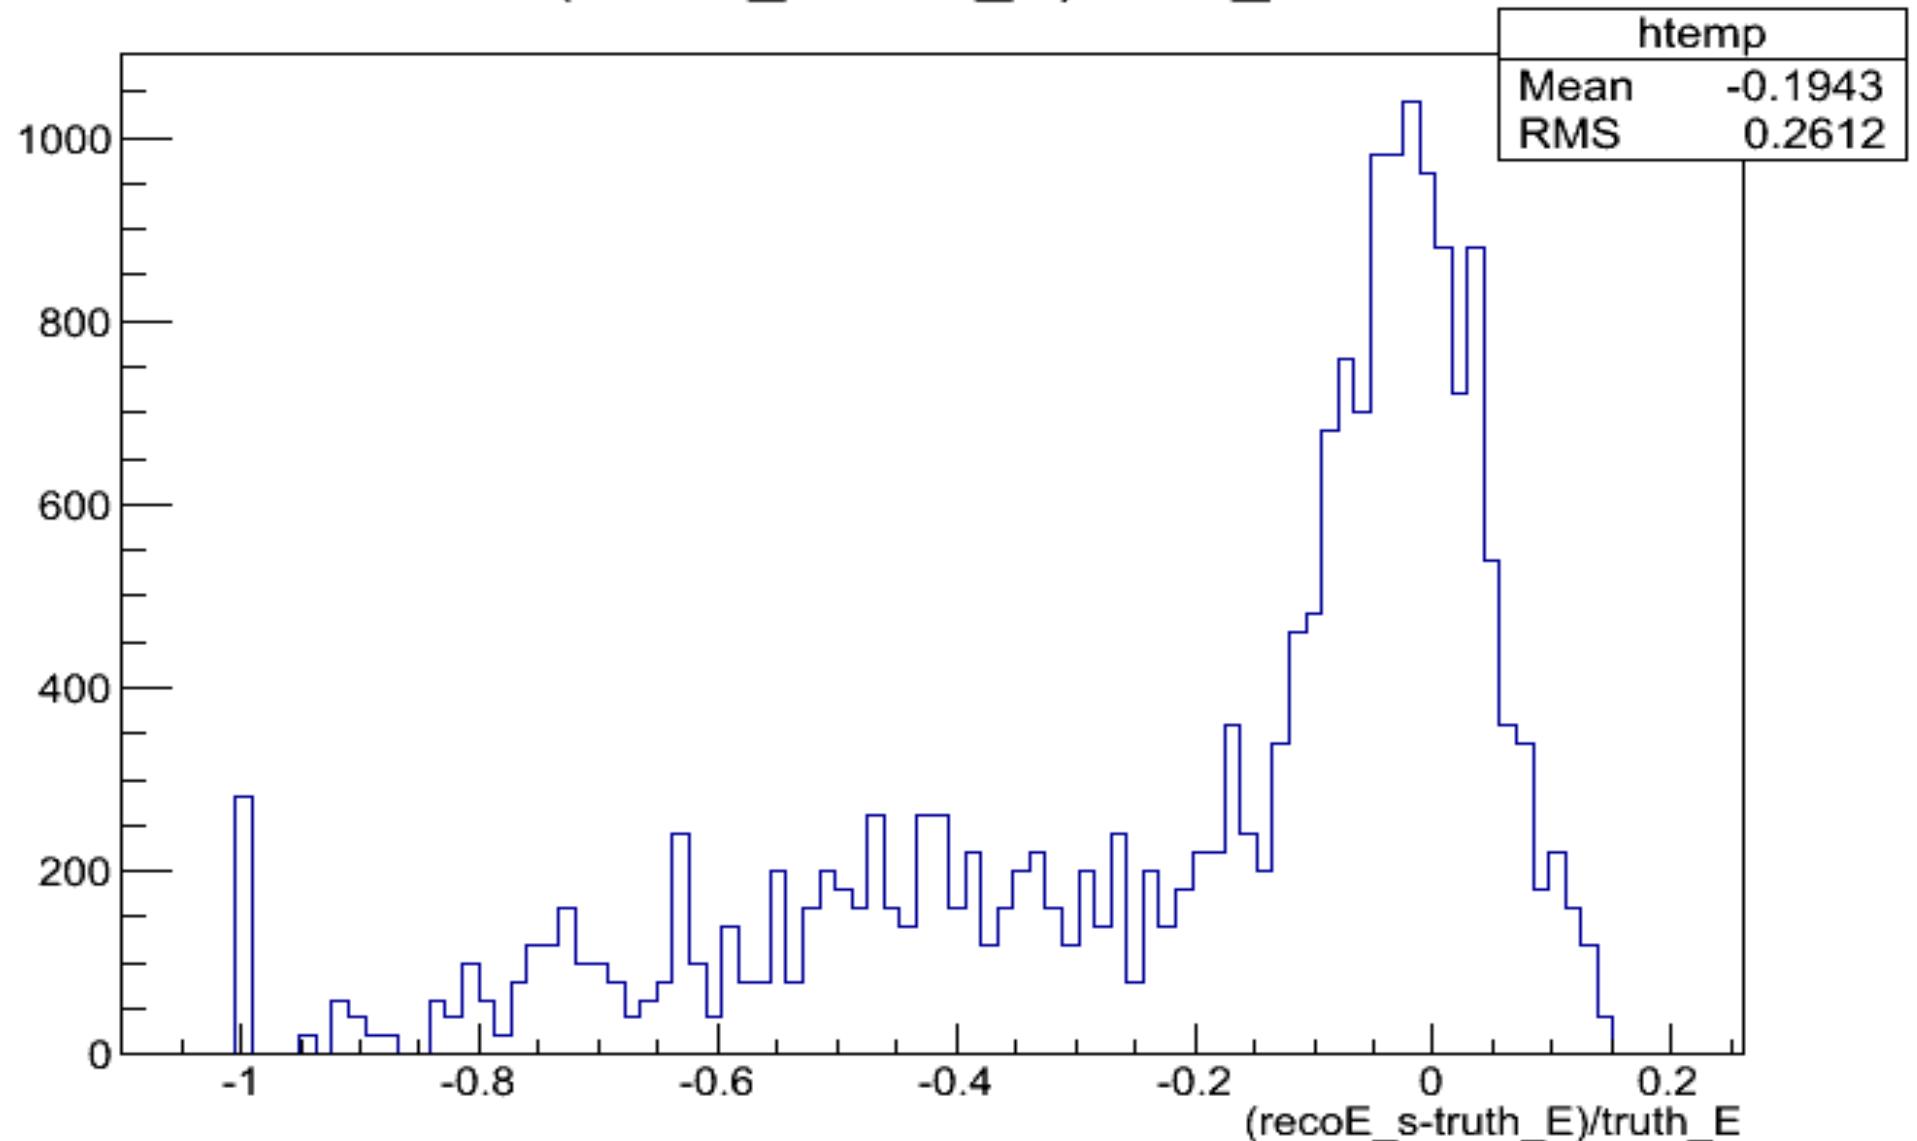

recoE_s/truth_E:truth_E

keV

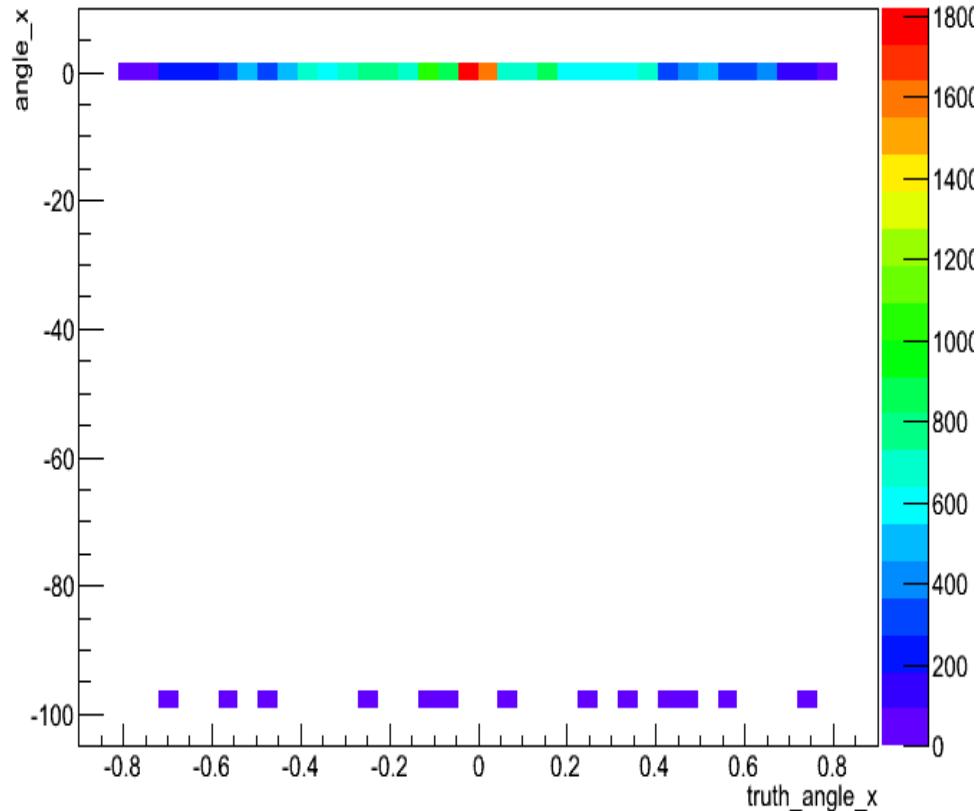

$(\text{recoE}-\text{truth}_E)/\text{truth}_E$

$(\text{recoE}_s-\text{truth}_E)/\text{truth}_E$

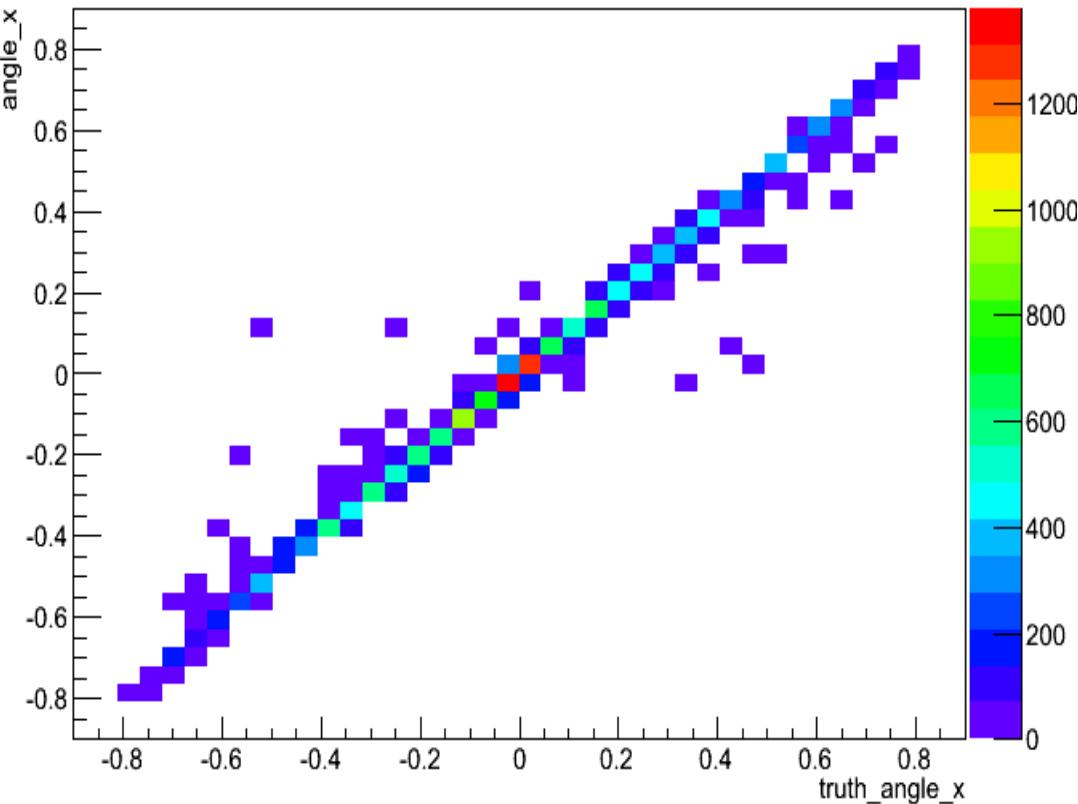

reco angle_x vs true angle_x

angle_x:truth_angle_x

angle_x:truth_angle_x {angle_x > -10}

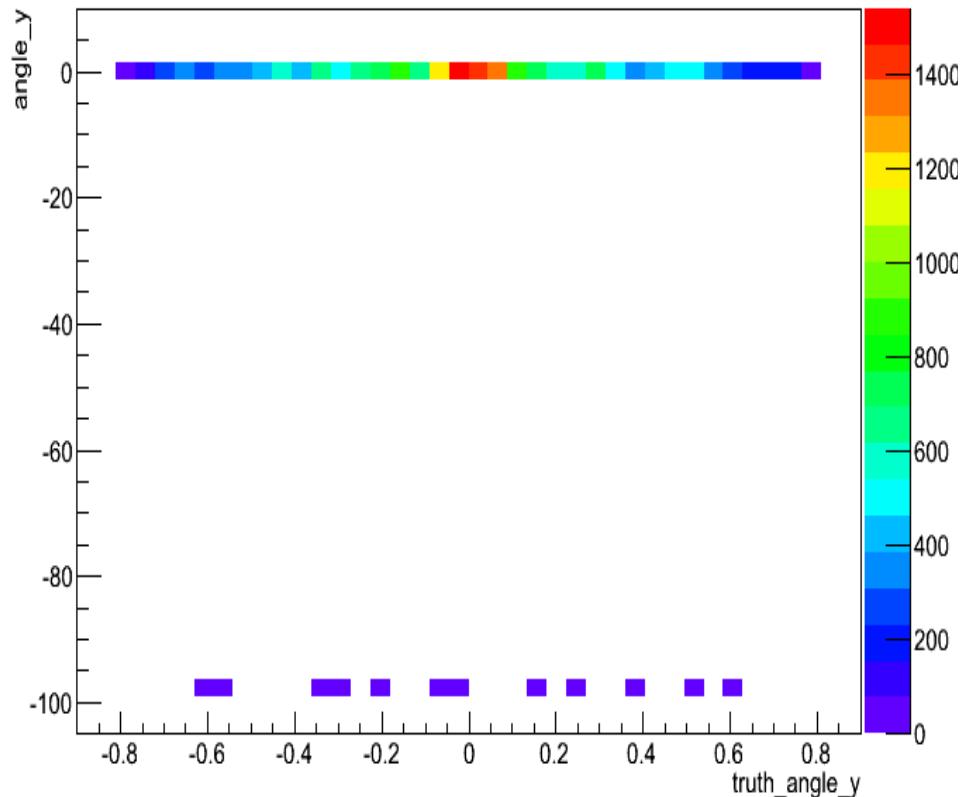

Original Plot

Why reco angles have value
of -100 ?

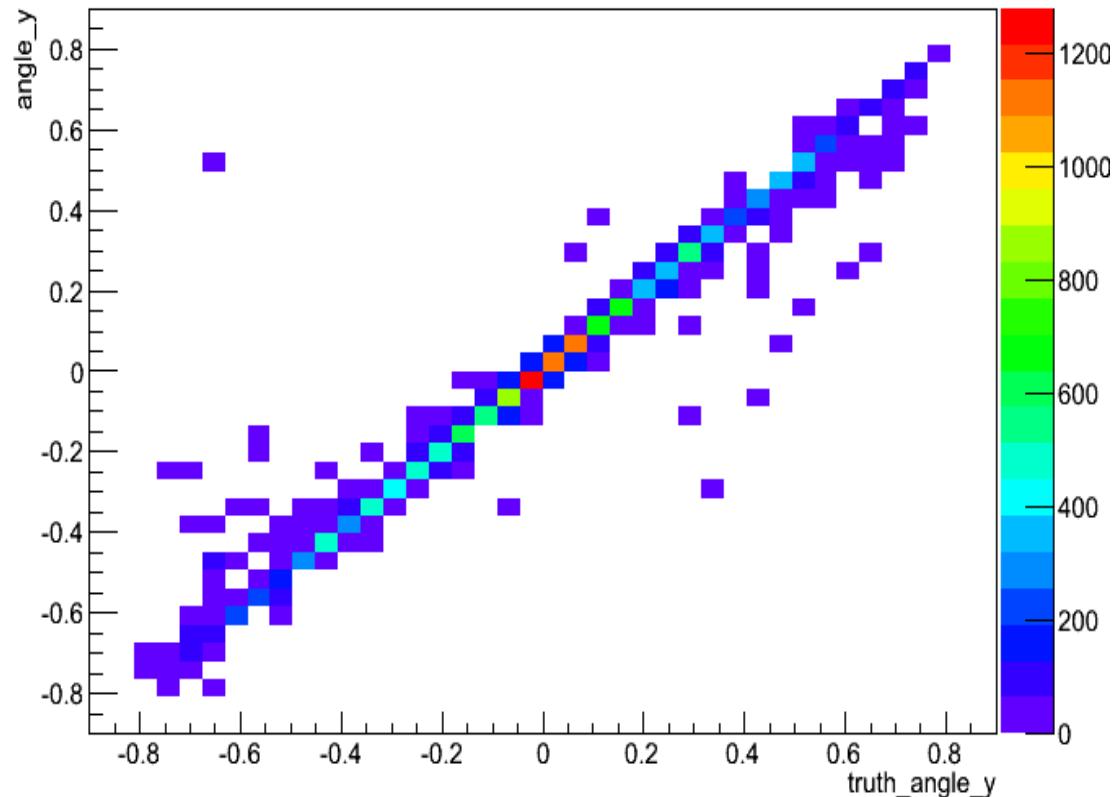

“Zoomed in” at truth angle Plot

reco angle_y vs true angle_y

angle_y:truth_angle_y

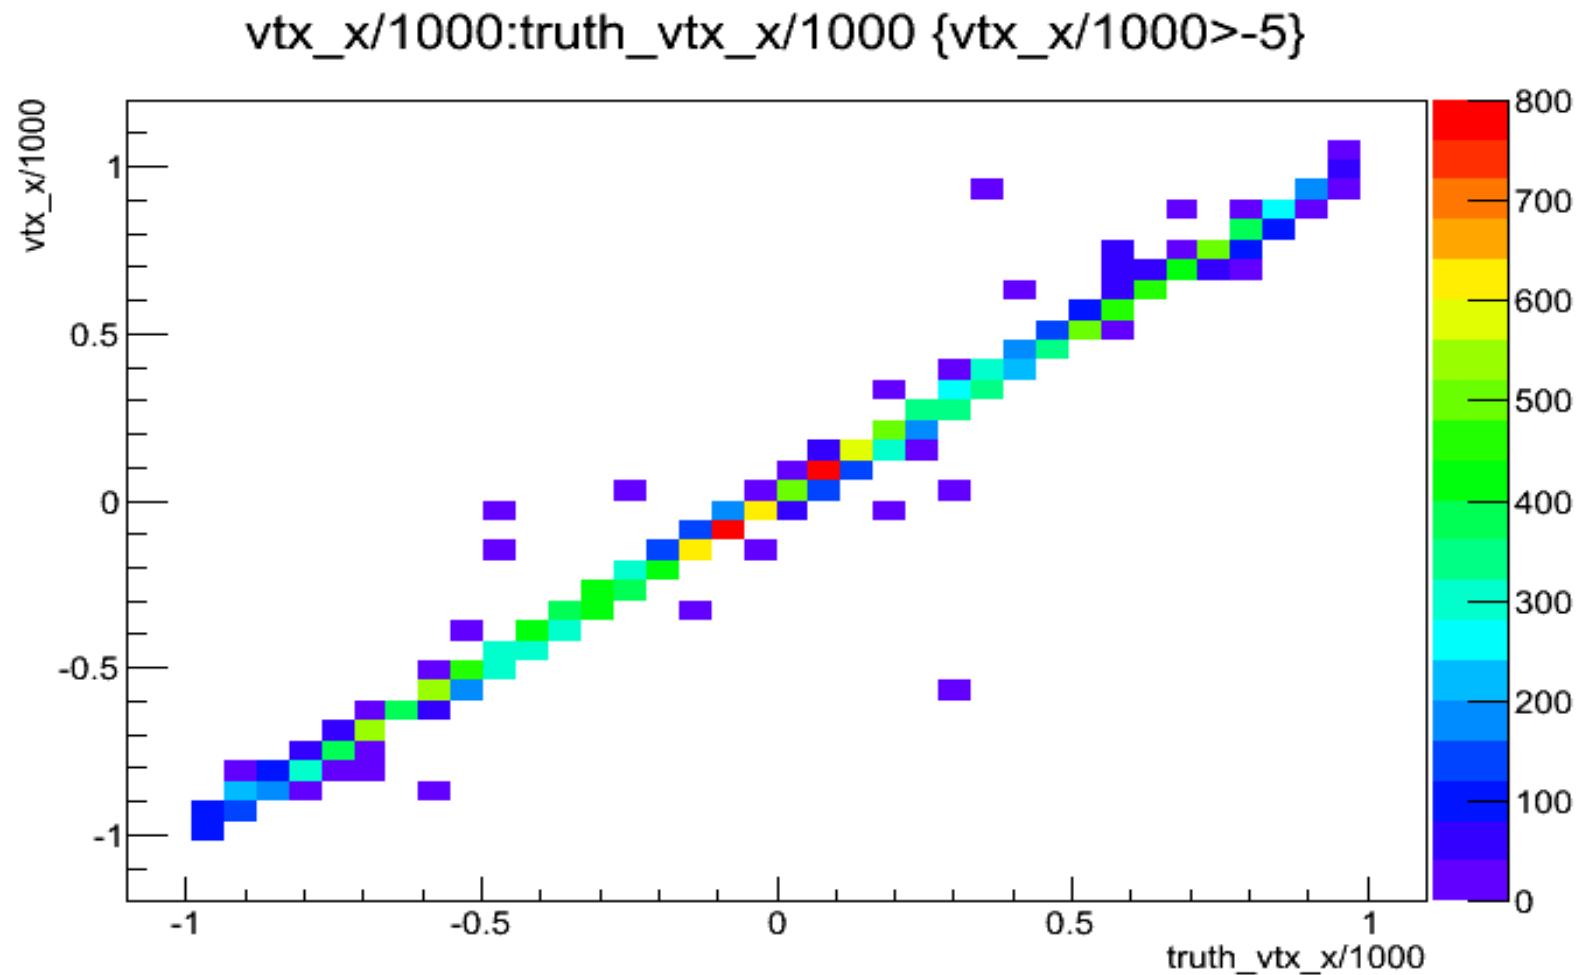

angle_y:truth_angle_y {angle_y>-10}

Same for angle_y

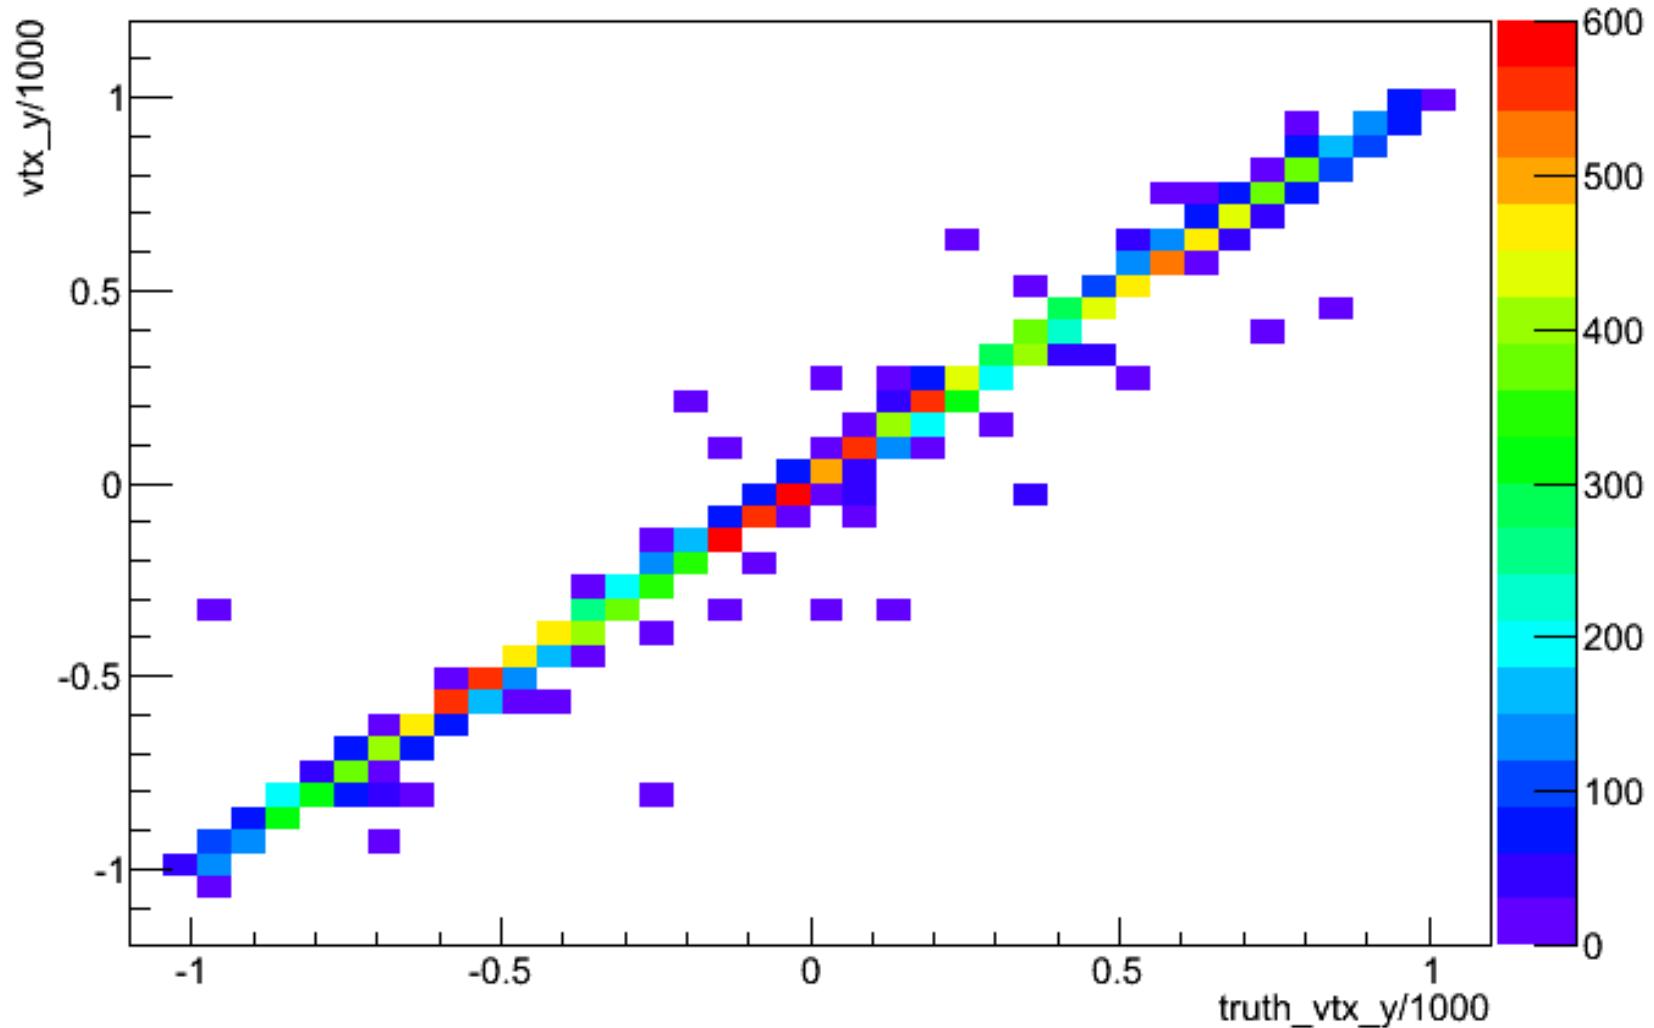

reco vertex x vs true vertex x

There are some Reco vertex x = -10 m(?) --are removed

reco vertex y vs true vertex y

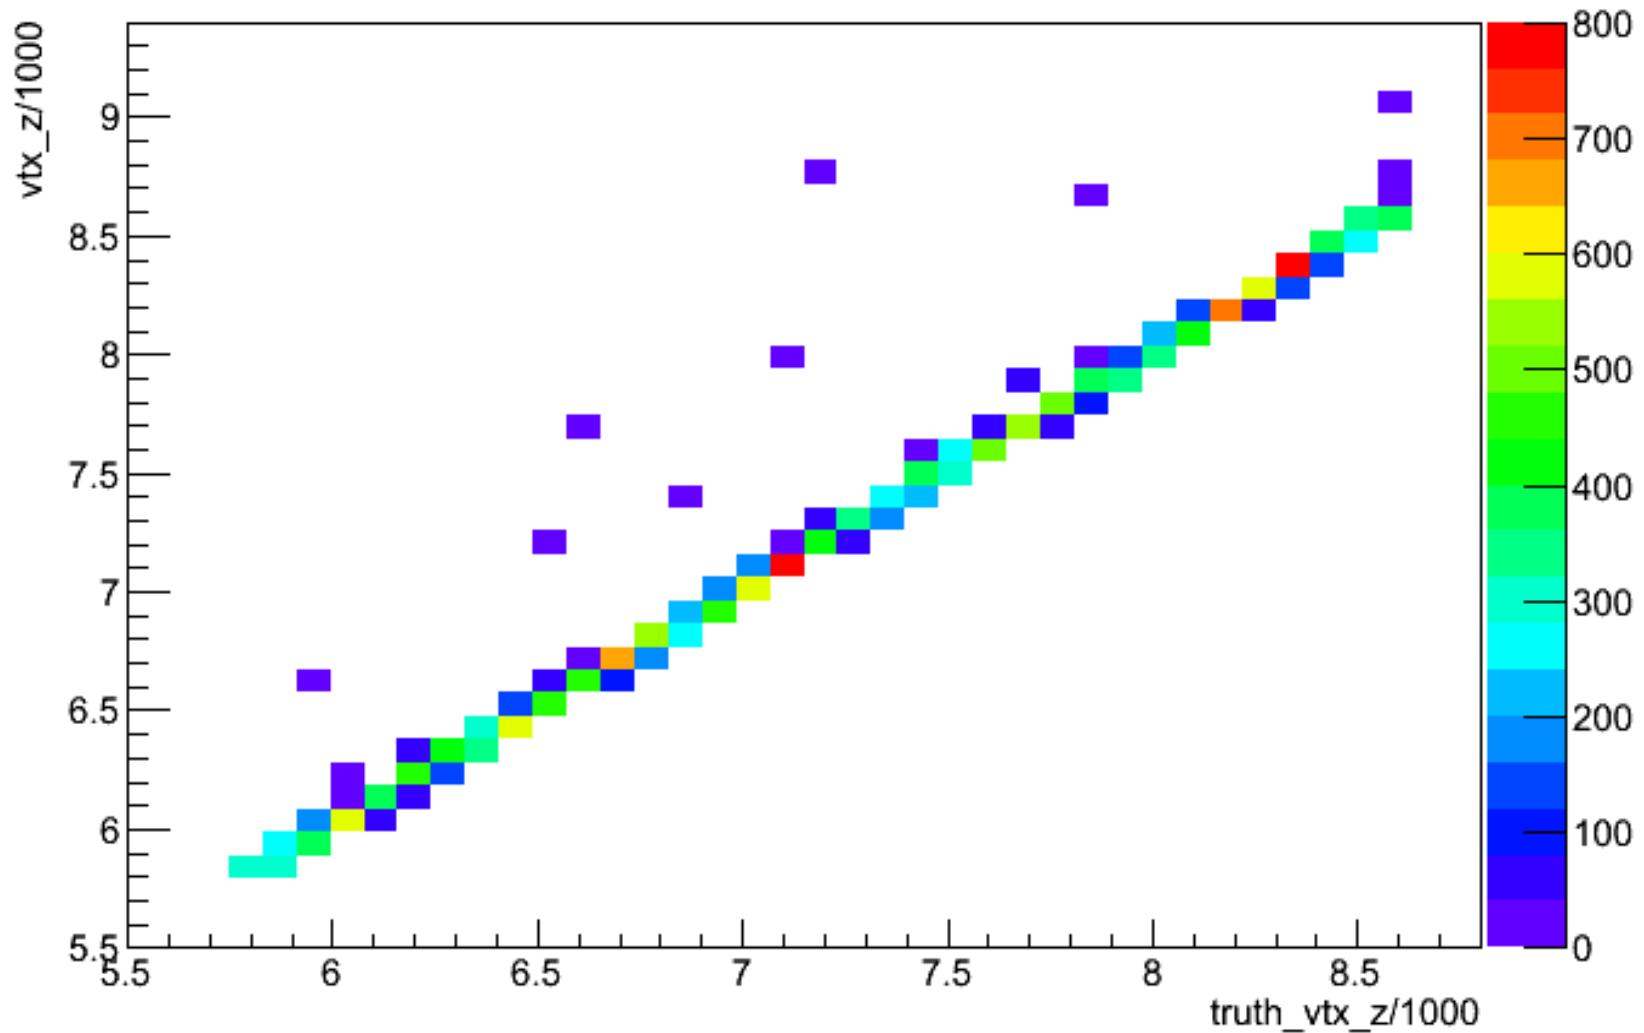

$\text{vtx_y}/1000:\text{truth_vtx_y}/1000 \{ \text{vtx_y}/1000 > -5 \}$

Same for vertex y

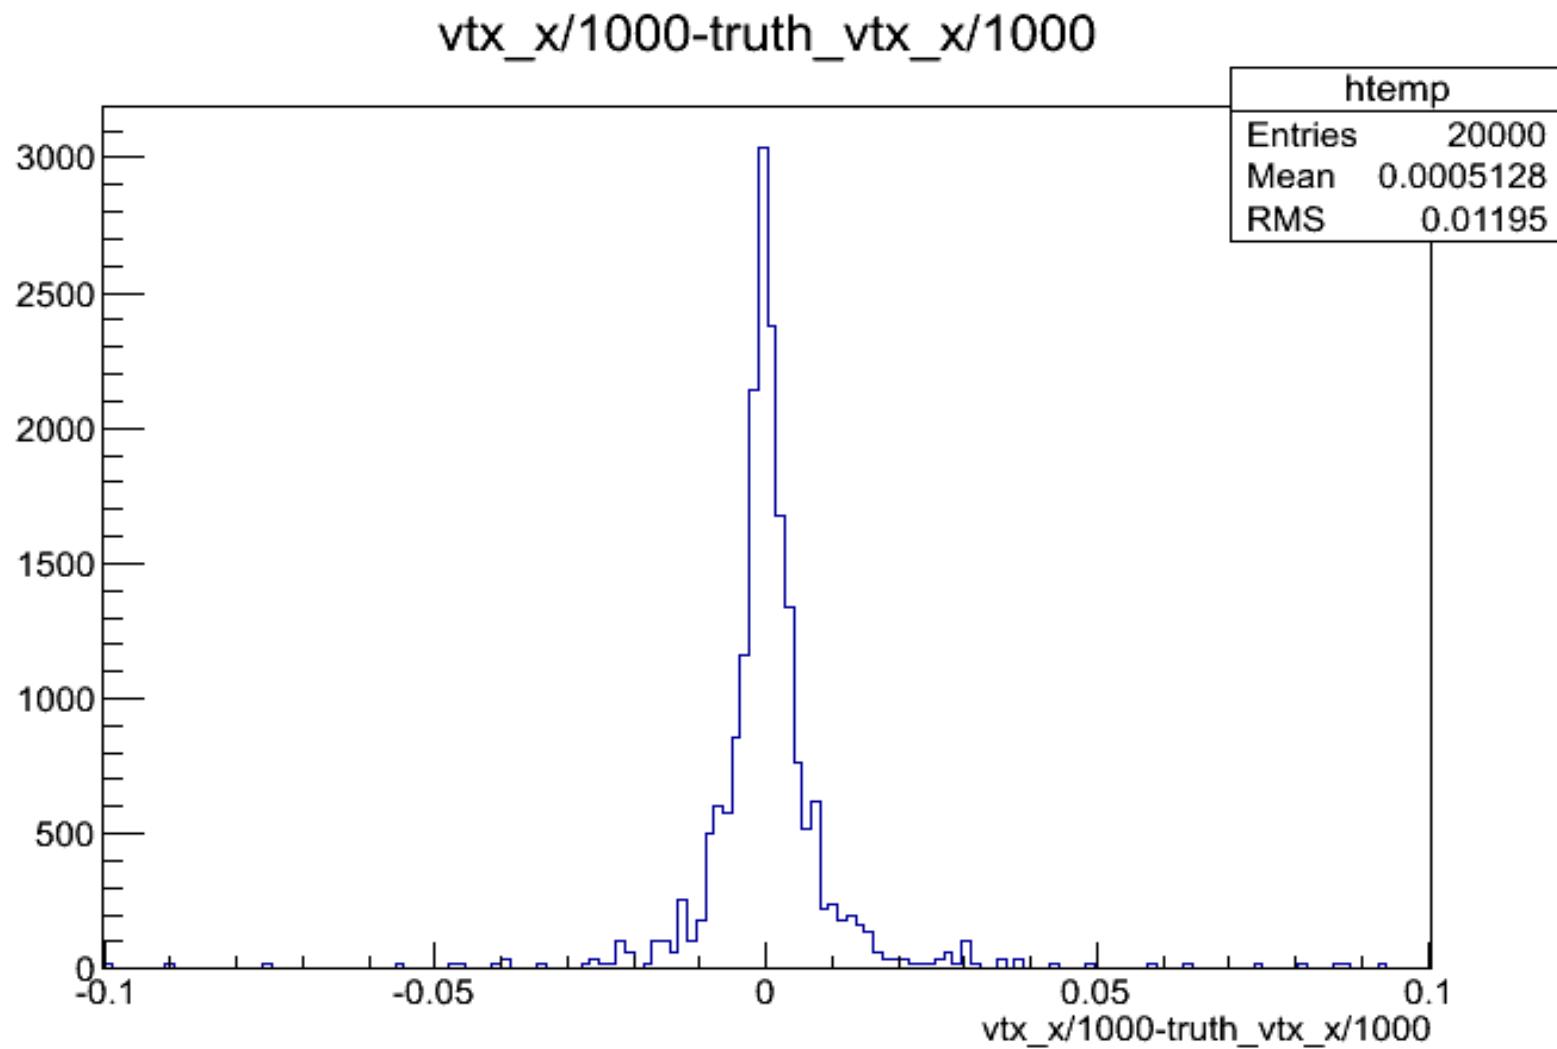

reco vertex z vs true vertex z

$\text{vtx_z}/1000:\text{truth_vtx_z}/1000 \{\text{vtx_z}/1000>-5\}$

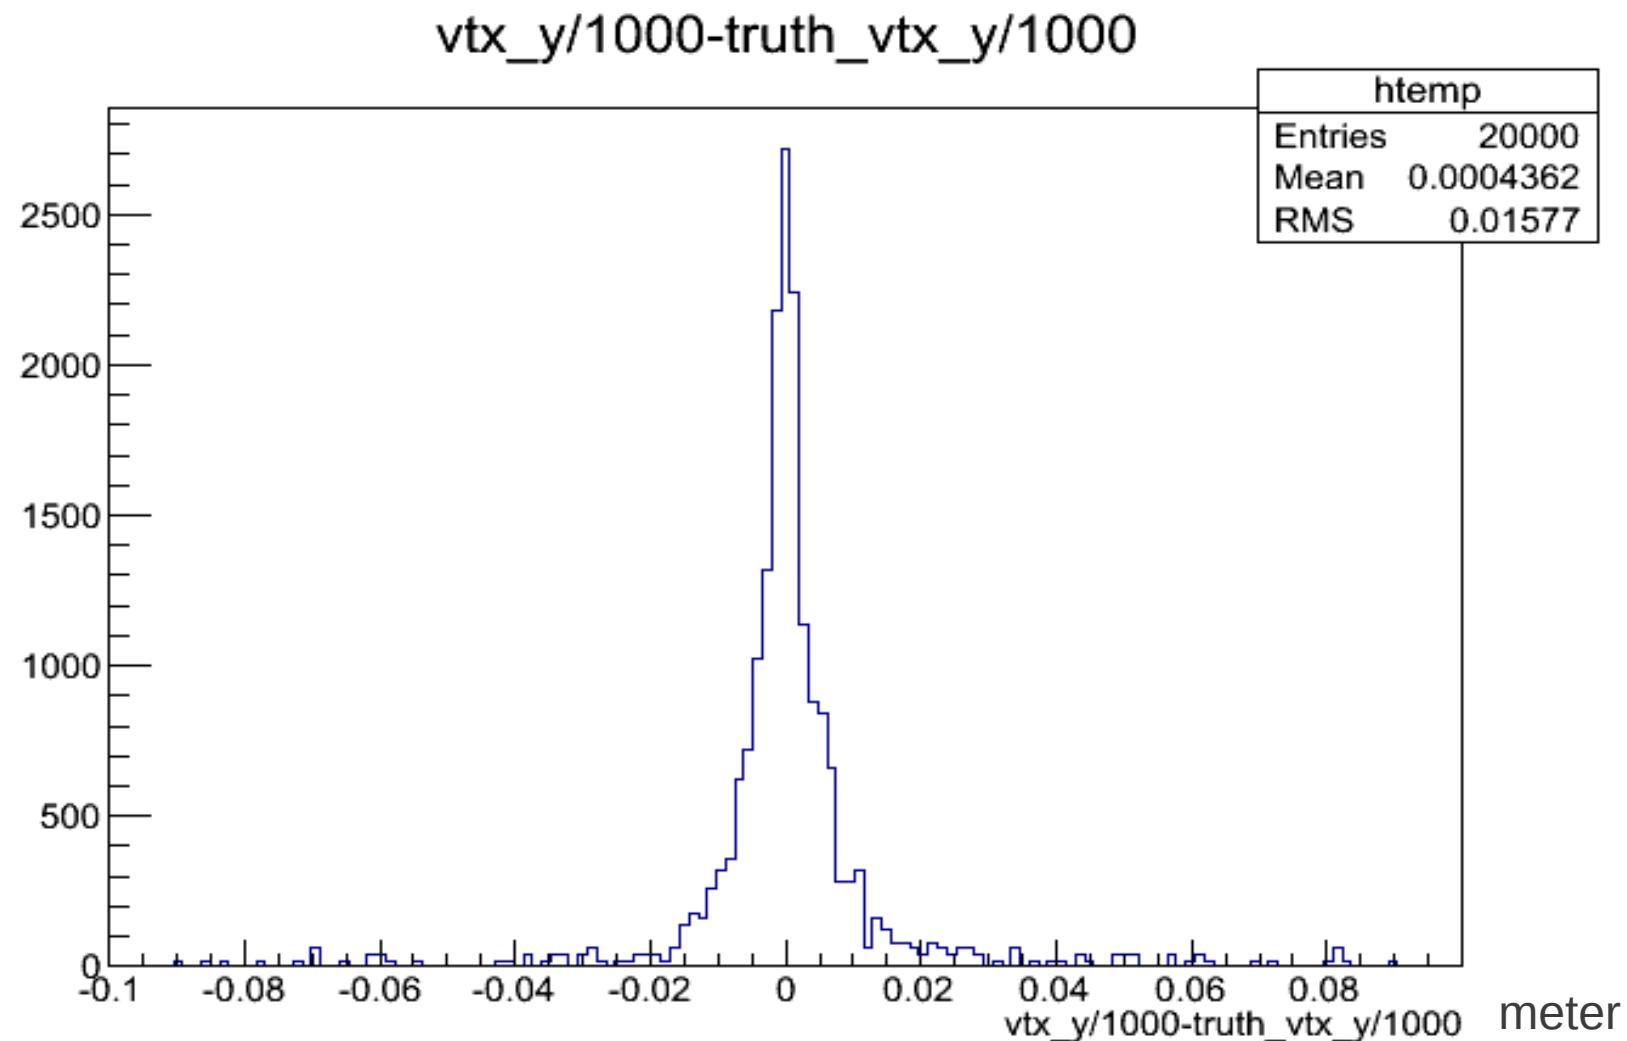

Same for vertex z

reco vertex x - true vertex x

reco vertex y - true vertex y

reco vertex z - true vertex z
